

Doubles Detection for Parcels

Detect multiple items Loop sorters (tilt tray, cross-belt) or belts

Line speeds are typically 1.5-2.5 M/S

Prevent mis-sorts, rehandlings, loss productivity and waste

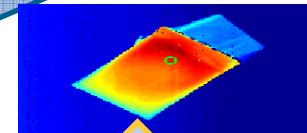

Doubles Detection for Parcels

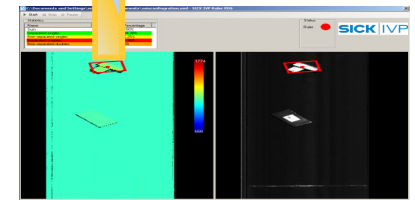

3-D Vision

- All products, including thins
- Side-by-Sides, Piggy-backs
- Superior performance

Volume

- Smaller products
- Side-by-Sides
- Strong, proven approach

Sensors

- Larger products
- Side-by-Sides
- Very economical approach
